DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method of forming a self assembled monolayer as a barrier layer, classified in class 438, subclass 763.
 - II. Claims 12-23, drawn to a self-assembled monolayer formed as a barrier layer, classified in class 257, subclass 642.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as by liquid phase contacting in the absence of a solvent, by gas phase contacting in the absence of a solvent, or by deposition of multiple layers followed by rinsing or etching back to a monolayer, etcetera.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2813

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

Should Applicant elect the invention of Group I, one of the following species must be elected:

I-A. Claims 6, 8, and 10 are drawn to the organic portion of the self-assembled monolayer (SAM) *benzene derivatives*.

I-B. Claims 7, 9, and 11 are drawn to the organic portion of the self-assembled monolayer (SAM) *pyridine derivatives*.

Currently, claims 1-5 are generic to the invention of Group I.

Should Applicant elect the invention of Group II, one of the following species must be elected:

II-A. Claims 14, 16, 20, and 22 are drawn to the organic portion of the self-assembled monolayer (SAM) *benzene derivatives*.

II-B. Claims 15, 17, 21, and 23 are drawn to the organic portion of the self-assembled monolayer (SAM) *pyridine derivatives*.

Currently, claims 12, 13, 18, and 19 are generic to the invention of Group II.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
